

Comment from Liaison William Funk on *Precedential Decision Making in Agency Adjudication*
November 3, 2022

Lines 13-14 – I don't understand how effective use of precedential decisions "help[s] agencies to better engage in dialogue with the courts." I would just strike this and leave the providing notice to the public idea.

Line 14 – I would delete "important" – Even unimportant developments in the substantive law can be important to particular members of the public or regulated entities. That is, any change in the substantive law is in a sense important.
