Administrative conference,

I am an inventor with a few patents and applying for more. My belief in the system was when one took the time to have a patent filed and with the grace of God received a patent that meant that all items were researched and found that I am the sole inventor/designer of that invention. (**** NO one Should be allowed to take that away from me ***). There should be NO court NO PTAB the inventor by the right of receiving a patent granted by the US GOVT. Should stand on its own as the system was designed for NOT Big businesses wanting to Steal and Profit from the Inventors hard work and Ideas.

The PTAB needs to be stopped and system needs to be fully reinstated and it was for the protection of the Inventor.
