

Comment from Government Member Helen Serassio on *Technical Reform of the Congressional Review Act*
December 10, 2021

If it isn't too late to provide a proposed amendment on the draft recommendation on the Technical Reform of the Congressional Review Act, we would like to propose an amendment to pg. 1, lines 15-16 (proposed language in red): "The hand-delivery requirement has been the subject of persistent criticism on the grounds that it is inefficient and outdated and results in exorbitant costs to federal agencies."

We propose this addition to reflect that hand delivering hard copies of the rules to Congress and the Comptroller General is also a costly practice.

If you have any questions, please let us know.

Best,

Helen
