ARTIFICIAL INTELLIGENCE IN FEDERAL AGENCIES

Symposium Presented by:

Administrative Conference of the United States and
the Institute for Technology Law & Policy at Georgetown Law

Artificial Intelligence In The Trenches:
A View From Inside The Agencies

Thursday, August 13, 2020, 1:00 p.m. – 2:00 p.m. ET
Webinar (registration required at link below)

Artificial Intelligence plays an increasingly important role in the administration of federal programs. Through four virtual panels this summer, ACUS and ITLP will explore current and future agency uses of AI and their interplay with administrative and constitutional law doctrines.

In this final panel, current and former agency officials will discuss how their agencies currently use or contemplate using AI to support their missions and improve the government's efficiency and effectiveness.

Opening Remarks

Matthew Wiener, *Vice Chair and Executive Director, Administrative Conference of the United States*

Panel Discussion

Marco Enriquez, *Senior Applied Mathematician, Office of Data Science, Securities and Exchange Commission*
Kurt Glaze, *Program Analyst, Office of Analytics, Review, and Oversight, Social Security Administration*
Sean Khozin, *Global Head of Data Strategy, Janssen R&D; Formerly Associate Director, Oncology Center of Excellence, Food and Drug Administration*
Steven Babitch, *Head of AI Portfolio, Technology Transformation Service, General Services Administration*

Moderator: Stephen Sanford, *Director, Center for Strategic Foresight, Government Accountability Office*

Closing Remarks

Hillary Brill, *Interim Executive Director, Institute for Technology Law and Policy*
