

Inflation Adjustment Act

Committee on Administration and Management

Proposed Recommendation | December 6-7, 2012

1 Civil monetary penalties are used by the Congress and federal agencies to enforce and
2 promote compliance with federal laws and regulations by deterring violations. These laws and
3 regulations serve vital public purposes such as ensuring workplace or transportation safety,
4 preserving the environment, and protecting consumers from dangerous products. As the then
5 Deputy Director of the Office of Management and Budget testified to Congress regarding an
6 earlier version of the Federal Civil Penalties Inflation Adjustment Act of 1990 (“the Act” or “the
7 Inflation Adjustment Act”), civil monetary penalties “do more than recover funds and sanction
8 wrongdoers. They often serve as an effective alternative to court prosecutions and provide
9 added deterrence to would be wrongdoers intending to defraud or abuse government
10 programs.”¹

11 This Recommendation and the supporting Report build upon important earlier
12 Administrative Conference works on agency authority to adjust and impose civil monetary
13 penalties or on inflation adjustment. For example, in Recommendation 84-7, *Administrative*
14 *Settlement of Tort and Other Monetary Claims Against the Government*, the Conference
15 encouraged Congress to “systematically raise ceilings on all agency authority to settle claims
16 where inflation has rendered obsolete the present levels.”² Recommendation 79-3, *Agency*

¹ *Federal Civil Penalties Inflation Adjustment Act of 1987: Hearing on S.1014 Before the Subcomm. on Oversight of Gov't Mgmt. of the S. Comm. on Gov't Affairs*, 101st Cong. 41 (1988) (statement of Joseph Wright Jr., Deputy Director of the Office of Management and Budget) [hereinafter 1988 Senate Hearing].

² ACUS, Recommendation 84-7, *Administrative Settlement of Tort and Other Monetary Claims Against the Government*, 49 Fed. Reg. 49,840 (Dec. 24, 1984).

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

17 *Assessment and Mitigation of Civil Money Penalties*, examined agency civil monetary penalty
18 assessment and mitigation practices.³

19 Congress enacted the Federal Civil Penalties Inflation Adjustment Act of 1990 in
20 recognition that “the power of Federal agencies to impose civil monetary penalties for
21 violations of Federal law and regulations plays an important role in deterring violations and
22 furthering the policy goals embodied in such laws and regulations.”⁴ Congress sought to
23 “improve the collection by the Federal Government of civil monetary penalties” given that
24 “inflation has weakened the deterrent effect of such penalties” and that the government did
25 not “maintain comprehensive, detailed accounting of the efforts of Federal agencies to assess
26 and collect civil monetary penalties.”⁵ The 1990 statute required the President to report
27 annually to Congress on federal civil monetary penalties covered by the law, and to calculate a
28 cost-of-living adjustment for those penalties.⁶ At the time, agencies did not have legal
29 authority to adjust civil monetary penalties directly. Any such modification had to be made by
30 the passage of new legislation. Due to the slow pace of amendments of agency organic
31 statutes in recent years, substantial periods of time could elapse between specific statutory
32 adjustments of civil monetary penalty amounts, and the deterrent effect of the penalties could
33 be diminished by the effects of inflation in the interim period. Accordingly, Congress
34 considered adoption of a freestanding provision that would establish a procedure through
35 which regulatory agencies could modify the amounts of the penalties they may assess without
36 further legislative action.

³ ACUS, Recommendation 79-3, *Agency Assessment and Mitigation of Civil Money Penalties*, 44 Fed. Reg. 38,824 (July 3, 1979).

⁴ Pub. L. 101-410, 104 Stat. 890 (1990) (codified as amended at 28 U.S.C. § 2461 note § 2(a)).

⁵ *Id.* § 2(b). See also 1988 Senate Hearing, *supra* note 1, at 3 (statement of Senator Levin) (discussing the need to increase penalties to account for inflation and improve deterrence and noting that civil monetary penalties collected were over \$400 million per year).

⁶ *Id.* §§ 4-5.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

37 In 1996, Congress amended the Federal Civil Penalties Inflation Adjustment Act to
38 authorize and require the agencies, with limited exceptions for four statutory programs, to
39 adjust their civil monetary penalties for inflation.⁷ However, the implementation data
40 demonstrate that under the mechanisms adopted by Congress, the adjustments regulatory
41 agencies are authorized to make have not allowed the penalties to keep pace with the rate of
42 inflation that has been experienced.⁸ The existing pattern of adjustments has several
43 anomalous features that may not have been apparent to the members of Congress when they
44 adopted the 1996 legislation. These results raise the questions of whether Congress would find
45 that the current pattern of penalty adjustments carries out the purposes of the statute, or
46 whether Congress would prefer a modified adjustment procedure under which future changes
47 in penalties would more closely track the actual rate of inflation.

48 Three statutory provisions account for why the adjustments lag behind the actual
49 inflation rate. First, the Inflation Adjustment Act imposes a ten percent cap on initial penalty
50 adjustments.⁹ That cap creates an “inflation gap” which reflects the sometimes considerable
51 difference between penalties, as adjusted under the Act, and the levels that such penalties
52 would reach if the first adjustment had been based on changes in the cost of living that had
53 actually occurred. This gap, once established in the first capped adjustment, grows over time as
54 subsequent adjustments are made and can never be closed under the current statutory
55 scheme.¹⁰

⁷ Pub. L. No. 104-134, 110 Stat. 1321 (1996) (excluding penalties under the Internal Revenue Code, the Occupational Safety and Health Act, the Social Security Act, and the Tariff Act).

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

56 Second, the Act directs federal agencies to use Consumer Price Index (“CPI”) data in
57 ways that are out of sync with inflation. Because of the Act’s definition of “cost-of-living
58 adjustment,” agencies must use CPI data that are at least seven months old, and sometimes as
59 much as 18 months old in their adjustments, depending on when the agency chooses to update
60 its penalties.¹¹ Adjustment of penalties using out-dated data creates a phenomenon known as
61 “CPI lag.” The legislative history of the Act suggests that the “CPI lag” may have resulted from
62 changes introduced during the iterative legislative drafting process, rather than by conscious
63 design.¹² As with the “inflation gap” issue, CPI-based adjustments prescribed by the Act result
64 in chronic underadjustment of civil monetary penalties relative to actual inflation.¹³

65 Third, the Act’s elaborate rounding rules effectively prevent a second inflation
66 adjustment for some penalties until inflation has increased by a total of at least 45 percent.¹⁴ In
67 an apparent scrivener’s error, the Act ties the rounding of civil monetary penalty increases to
68 the amount of the underlying civil penalty, rather than the base amount of the increase.¹⁵ Over
69 time, the rounding mechanism has the effect of deferring increases for certain penalties, only
70 to unleash dramatic penalty increases after a long latency period (in some instances greater
71 than the actual increase in inflation). For example, at an inflation rate of 2.5 percent, the
72 rounding provisions, coupled with the 10 percent initial cap, could prevent an agency from
73 adjusting its penalties for inflation for 15 years or more.¹⁶ As with nonadjustment or under-
74 adjustment, over-adjustment may also alter the intended effect of civil monetary penalties.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

75 The Department of Homeland Security’s 2011 adjustment of a host of penalties for
76 violations of the Immigration and Naturalization Act offers an excellent illustration of how the
77 Inflation Adjustment Act works in action and why Congress should consider revisiting the
78 operation of these procedures.¹⁷ These penalties relate to a number of serious legal violations,
79 including: failure to depart the U.S. voluntarily, failure to comply with removal orders or to
80 remove alien stowaways, failure to report an illegal landing or desertion of an alien crewmen or
81 passenger, or failure to prevent the unauthorized landing of aliens.¹⁸ The following table, which
82 is based on the Department’s 2011 inflation adjustment, displays:

- 83 • the current penalty amount;
- 84 • the raw amount by which each penalty would be increased if adjusted for actual
85 inflation;
- 86 • the effect of the Inflation Adjustment Act’s constraint on inflation adjustment
87 through, for example, capping the penalty adjustment at a maximum of a ten
88 percent increase;
- 89 • the amount of the penalty increase prescribed the Act; and
- 90 • the distortion created by the variance between the raw adjusted penalty and the
91 adjustment prescribed by the Act.

92 The distortions created by the Act are considerable, particularly when considered in
93 relation to the size of the unadjusted penalty.

¹⁷ See Department of Homeland Security, *Civil Monetary Penalties Inflation Adjustment*, 76 Fed. Reg. 74,625, 74,627-28 (Dec. 1, 2011). It is important to note, however, that several penalties adjusted in 2011 had not previously been adjusted or had not been adjusted for many years. As a result, the distortions caused by the Inflation Adjustment Act may have been magnified.

* * *

94 The issues with the Federal Civil Penalties Inflation Adjustment Act described above
 95 arise from its plain language, and federal regulatory agencies may not themselves adjust the
 96 penalty levels to track the inflation rate more closely. As the Government Accountability Office
 97 has found, some agencies have attempted to adjust civil monetary penalties in common-sense
 98 ways that better reflect the real economic impact of inflation.²⁰ However, these good faith

¹⁹ This table presents a subset of four penalties from the table of penalty adjustments contained in the 2011 *Federal Register* notice from the Department of Homeland Security, *id.*, together with two additional columns ([H] and [J], denoted by a *) from the Chen Report, *supra* note 8, at IV.C.

²⁰ *E.g.*, GAO, GAO-02-1084R, COMPLIANCE WITH THE INFLATION ADJUSTMENT ACT (2002) (reporting that the Farm Credit Administration had rounded its penalty increase by the size of the increase rather than the penalty size); GAO, GAO-02-1085R, DEPARTMENT OF COMMERCE: COMPLIANCE WITH THE INFLATION ADJUSTMENT ACT (2002) (reporting that the

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

99 efforts objectively did not comply with the plain language of the Inflation Adjustment Act. They
100 also subjected agencies to the risk of legal challenges to penalty adjustments.

101 Review of *Federal Register* notices also shows that several agencies have failed to
102 comply with the statutory requirement to review and, if necessary, adjust penalties at least
103 once every four years.²¹ Regular penalty adjustments ensure the continued deterrent effect of
104 civil monetary penalties. This is especially important where maximum penalties are imposed by
105 agencies to punish the worst offenders. It is essential to enforcement policy that the penalties
106 have their intended deterrent effect and are not simply viewed as a cost of doing business.

107 The Administrative Conference therefore recommends that Congress reexamine the
108 procedures set forth in the Inflation Adjustment Act and consider whether changes to the Act
109 are appropriate. The Recommendation also advises agencies to comply with the letter of the
110 law, by applying the rounding adjustment based on the size of the penalty, rather than the size
111 of the increase, and by making adjustments every four years. Agencies should be mindful of
112 the financial or other adverse consequences of failing to adjust civil monetary penalties
113 regularly, in compliance with the Inflation Adjustment Act, or of failing to comply with the
114 adjustment provisions currently set forth in the Act.

115 The current Recommendation is intentionally circumscribed in scope. The underlying
116 research commissioned by the Conference examined only the existing statutory process for
117 inflation adjustments under the Inflation Adjustment Act. The Recommendation does not
118 address other potential issues involving the current process, including: the appropriateness of
119 the Act's existing exemption for civil monetary penalties under four statutes or whether

Department of Commerce had rounded its penalty increase by the size of the increase rather than the penalty size).

²¹*E.g.*, Department of Agriculture, *Department of Agriculture Civil Monetary Penalties Adjustment*, 75 Fed. Reg. 17,555 (Apr. 7, 2010) (remediating erroneous exclusion of some civil monetary penalties from earlier rounds of adjustments); Department of Transportation, *Civil Penalties*, 75 Fed. Reg. 5,244 (Feb. 2, 2010) (reporting last inflation adjustment six years ago, rather than four years ago as the Act's quadrennial interval prescribes).

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

120 additional agency programs should be exempt; the effectiveness of self-enforcement by federal
121 agencies; obligations for reporting compliance; the lack of a central authority for administering
122 the Act; alternative metrics for measuring inflation; or alternative forms of civil monetary
123 penalties (*e.g.*, percentages rather than fixed values). These important issues warrant
124 thoughtful consideration and may lead to future Conference recommendations.

RECOMMENDATION

125 **Part A. Recommendation to Congress**

126 1. Congress should consider whether changes to the current statutory framework by
127 which agencies must make periodic inflation adjustments to civil monetary penalties set forth
128 in the Federal Civil Penalties Inflation Adjustment Act, codified as amended at 28 U.S.C. § 2461
129 note (2012), are appropriate in light of the following issues:

130 (a) The “inflation gap” created by a ten percent cap on the initial penalty
131 adjustment, which grows over time and can never be closed under the current statutory
132 provision.

133 (b) The “CPI lag” that results from the statute’s definition of the term “cost-of-
134 living adjustment,” which directs agencies to base their adjustments on CPI data that are
135 at least seven months old and may be as much as 18 months old, and thus lag behind
136 the actual inflation rate.

137 (c) The rounding rules that tie rounding of increases to the size of the penalty,
138 rather than the size of the increase, and that may result in significant periods of
139 nonadjustment of civil monetary penalties followed by abrupt and substantial increases.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

140 **Part B. Recommendation to Agencies**

141 2. Federal agencies subject to the Inflation Adjustment Act should review and, if
142 necessary, adjust their civil monetary penalties for inflation at least once every four years, as
143 required by the Act. Agencies should review their implementation procedures and practices to
144 ensure that inflation adjustments comply with the plain language of the Act, and particularly its
145 rounding provisions.
