low income people get zero help from agencies at the federal state local community level. they are ignored, spat upon and disrespected all of the time nobody helps you at the bottom of the line until you get twenty more peple to come and yell and scream. nothing about that has changed. aetna, social security is one example. i was injected by a medical doctor in a hospital setting with lidocaine, which almost killed me. it caused immediaely atrial fibrillations. the bill for the hospital that resulted in the tens of thousands of dollars - you get no help with that you are responsible and the doctor injecting lidocaine caused it immediately withint 2-3 hours. the insurance co ignores it. the hospital wants their money and they caused the illness. b ker
