Priority: High

Administrative Conference,

I am a product developer inventor, that holds two US Design Patents, my inventions and innovation were created to solve a problem. My designs took an enormous amount of information, knowledge, and awareness not to mention time and money to acquire my patents.

Our current system does not allow individuals like me to defend my patent rights, and benefit from my intellectual property. This is the opposite of what was intended for our US Patent System.

A small entity court that enables a small entity to defend their patent rights, is needed, rather than a small claims court. It needs the due process of, an Article III Court, but must be faster and less expensive for the person or company that holds the intellectual property.

I appreciate your time and efforts to this most important issue.

Thank you,
Alexa Milton
