Subject: Small claims Patent Court?

Juris Zanis Pupols -JZP Enterprise CN# 32060 case# 1-21-cv-1043 SCOTUS continued.
2022

During my connection with the USPTO, I've been robbed, hijacked IP, denied my rightfully
respective place as first Inventor of reciprocating action novelty items Ac/DC functional.
Patent Application 10/336,582 Provisional -60/361,736 2021cir

Granted small claims may be suitable for lesser complaints as errors within the USPTO
have tendency to cause the inventor losses etc.

It is a tragically shameful occurrence when individuals working in the office of USPTO
deem to barter the IP of the inventor as their own insider trading and felons of Grand
Larceny. So it is my professional opinion that you should hurry enact any means to
resolve litigation of compensatory relief for those effected by the substandard actions of
employees within the USPTO yet Al. 28-usc-1498 et al

Best regards Juris Pupols
