

Comment from Public Member Jack M. Beermann on *Clarifying Statutory Access to Judicial Review of Agency Action*  
June 13, 2021

Global question—what is the triggering event for review of an action that does not go into the Federal Register, such as an informal action, informal adjudication or formal adjudication?

Line 50—what if the specific statute provides for review in a district court?

Lines 153-156 I feel uneasy about 4e—Congress may have had a reason for specifying the content. What about suggesting that the Court is required to allow the party seeking review to cure any defect due to content as long as petition or complaint was filed in the appropriate time and gives sufficient notice of what is being reviewed?

Line 164 insert “either before or after filing”
