

Comment from Senior Fellow Alan Morrison on *User Fees*
November 24, 2023

Line 56 - Should "accountability for government action" be changed to "accountability for imposition of user fees" - current version is too open ended?

Lines 69-70 - expresses concern that user fees revenue not be disproportionate to the benefits to those who pay them. But line 52 allows user fees to supplement government revenue. Are they consistent with each other?

Lines 89-90 - tells Congress to decide on penalties for late payment - should we add interest, including the rate?
