ARTIFICIAL INTELLIGENCE IN FEDERAL AGENCIES

Symposium Presented by:

Administrative Conference of the United States and the Institute for Technology Law & Policy at Georgetown Law

Bias and Government Artificial Intelligence

Wednesday, July 29, 2020, 2:00 p.m. – 3:15 p.m. ET
Webinar (registration required at link below)

Artificial Intelligence plays an increasingly important role in the administration of federal programs. Through four virtual panels this summer, ACUS and ITLP will explore current and future agency uses of AI and their interplay with administrative and constitutional law doctrines.

At this third panel, legal experts will discuss how artificial intelligence systems can encode implicit biases and how federal program managers can protect against bias when they rely on AI systems. Panelists will also discuss ways the government can use AI to detect and counter biased behavior by regulated entities.

Opening Remarks

Matthew Wiener, *Vice Chair and Executive Director, Administrative Conference of the United States*

Panel Discussion

David Super, *Carmack Waterhouse Professor of Law and Economics, Georgetown University Law Center*
Kristin Johnson, *McGlinchey Stafford Professor of Law, Tulane University Law School*
Alex Givens, *President and Chief Executive Officer, Center for Democracy & Technology*

Moderator: Chai Feldblum, *Partner, Morgan Lewis & Bockius; former Commissioner, U.S. Equal Employment Opportunity Commission; Public Member, Administrative Conference of the United States*

Closing Remarks

Chai Feldblum, *Partner, Morgan Lewis & Bockius; former Commissioner, U.S. Equal Employment Opportunity Commission; Public Member, Administrative Conference of the United States*
