Subject: Small Claims Patent Court comment

I am a small one man businessman and patent holder. The patent laws were instituted to protect the small inventor from encroachments by the rich and powerful companies. Your intent to change the protections that small inventors have enjoyed amounts to treason if you allow this effort to continue. Please do your job and expose any attempts by rich and powerful businessmen who offer you certain rewards if you provide them with what they demand. So many of our three letter agencies today have become corrupt and "captured" by the very people they are supposed to regulate. Please do your job honestly and turn this effort into a rebuke against the attempted tyranny of big money over the poor and hard working middle class in America. We're watching you carefully. Thank you very much.

Jonathon A. Landell
