Subject: Failed Patent System

Hi,

I am an independent inventor. I'm writing to let you know, that our current patent system is failing small entities and micro entities.

It is very difficult, if not impossible for us to defend our patents. We simply don't have enough money or resources and the big money/company infringers know this! They simply drag out any law suites filed in court until we can no longer afford to go on.

We need inventor representation on the consultancy committee!

Thank you for your consideration.

Respectfully,
Susan
